

Advantages of Netia BDI

Feature	Advantage	Benefit
Constant and guaranteed bitrate of the CIR line = 100%	Very good real transmission speed that does not change over time	The ability to download and send data in a short time
Symmetrical lines	Consistent speed of data upload and download	Possible installation of web server, mail, FTP, etc.
A modern backbone and access network with a high capacity	Guaranteed maximum transfer even during peak hours	Fast downloading and sending of data at any time
Extended IP network – connections with other international and national operators	Fast and reliable access to foreign and domestic resources	Very fast access to any sites, and downloading and sending of large files
Netia's modern, nationwide network management center	Guaranteed quick diagnosis and removal of potential breakdowns	Failure-free IP network, no transmission downtime, which is especially important for companies that base their business on the Internet (portals, hosting customers, banks)
